

# DAMARISCOTTA, ME HEART AND SOUL CHARRETTE

**Type:** Downtown and Corridor Master Plan  
**Size:** 12.6 square miles  
**Status:** Complete, Implementation underway

The Street Plans Collaborative provided bikeway network, bicycle parking, and other urban planning services for the Damariscotta, Maine Heart and Soul Community planning initiative. Funded by the Orton Family Foundation, and completed in collaboration with B. Dennis Town Planning and Design, TSPC was tasked with reviewing Damariscotta's existing bicycle and pedestrian mobility plan. TSPC provided a comprehensive bikeway route overlay plan, which included the introduction of five contextually appropriate bikeway types. TSPC's work also included a bicycle parking guide detailing bicycle rack location, design, and implementation standards.
